ETS SURCHARGE: The European Directive (EU) 2023/959 has been in force since 2024, which included the maritime sector in the system for trading CO2 emissions quotas, the European Union Emissions Trading System (EU ETS). This directive provides for the obligation for shipping companies to purchase EUA allowances on the regulated CO2 market (EUA: European Union Allowance, equivalent to 1 ton of CO2 emitted), in order to offset the emissions produced. The ETS Surcharge will be calculated on the basis of the CO2 emissions of each of our ships and the price of the EUA quota, and for these reasons may be subject to variations and recalculation over the months. Adria Ferries has always been committed to supporting national and international environmental policies through the constant renewal of the fleet and investments in more efficient technologies aimed at reducing polluting emissions and implementing alternative fuels.
